Strip Cutter

(Sample size 50mm x 300mm)

Usage : For preparation of test pieces towards use in tensile strength tests size 50mm x 300mm .

Device Description: sturdy punch fully made from metal with feeder table and hand lever for easy operation. The punch and dye cutting unit consist of an upper and lower blade guarantees accurate sample strips . for use in tensile strength tests, ring crush tests, folding endurance test, water absorbency test and other similar tests. It eliminates testing errors due to sample preparation. Cutting of multi samples simultaneously possible.

Test Description : the sample materials is placed on the feeder table and supported by the feeder edged placed under the punching unit. By pushing the hand lever down , the sample is automatically clamped and a safety guard covers the punching unit. The sample strips fall through the lower part of the punching unit and are collected on a metal support plate.
